Contents

1. Executive Summary

This document will outline the content creation work undertaken for TetRRIS website (deliverable 7.2).

Within this document you will find the details, content, and guidelines for the design of TetRRIS project's website (version 1). In website version 1, the following 5 preliminary pages according to the map provided on below will be developed: 'Home'; About; Partners; News; Contact. Additionally, following current pages' descriptions, a status update is provided regarding the website's second version pages (that will be built and launched).

The following preliminary map was presented to our project partners for initial idea creation and feedback is provided. This map is a prototype and subject to change and adaption as future versions of the website are planned and developed.

Figure 1: Website Preliminary Map

For each page of the live website, a description, link, image screenshot and notes on the content will be provided. Beyond the pages of the website that are now live, additional pages awaiting upload and design will be detailed.

TetRRIS

2. Pages

2.1.   Home

- Following this link, you can see the '*Home Page*' fully developed and on display.
- The information provided by the project here offers an introduction to viewers and summarises key pages of the project: News & events, partners, introductory concepts.
- In the Home Page, the designer paid specific attention to adequate spacing and figures to avoid overcrowding the page used visual designs to compliment textual information.

Figure 2 : 'Home' Page

2.2.   About

- Figure 3 depicts the second page of the live Website.
- Following this link, you can see the '*About* Page'. fully developed and on display.
- The information provided by the project serves. to inform viewers the basic concept of TetRRIS and its ways of working towards its objectives through its four phases.
- In the About Page, the designer paid specific attention to adequate spacing and figures to avoid overcrowding the page.

About tetRRIS

TETRRIS: TERRITORIAL RESPONSIBLE RESEARCH AND INNOVATION AND SMART SPECIALIZATION

is an **EU funded project** aiming to bring Responsible Research and Innovation in alignment with the Smart Specialization paradigm and governance within 4 pilot experiment regions from the European Union.

Tampere, Karlsruhe, Cantabria, and Szeged-Timisoara are the central focus and these are the pilot regions/territoires through which the projects experiments will be channeled.
TetRRIS will marry RRI with S3 in the pilot regions with its activities centred on the project's pilot regions will go through several stages: indentifing and scoping; framing and orchestration; co-design, deployment and continuation; policy messages and scientific insights.

Indentify, develope and replicate

PHASE 1.
IDENTIFYING AND SCOPING

Critical to the understanding of RRI within the pilot regions is the first phase where a mapping of regional R&I actors and societal stakeholders who are seeking a resolution to issues affecting R&I at a local/territorial level (TRIS).

PHASE 2.
FRAMING AND
ORCHESTRATION

TetRRIS

2.3.   Partners

- Figure 4 depicts the third page of the live Website.
- Following this link, you can see the '*About* Page'. fully developed and on display.
- The information provided by the project serves to inform viewers the basic introduction the whole consortium.
- In the this Page, the designer's simple design allowed for as much detail as possible to be provided in textual format.
- In future versions of the website, personalisation and increasing use of visualisations will be used.

.

TetRRIS is encompassed by 9 partners from 6 European countries – Finland, Spain, Germany, Hungary, the Netherlands, Belgium, .

The project's partners are highly inter- and transdisciplinary, building on long lasting experiences in RRI, territorial innovation and Smart Specialization (theory, practice, and policy). Coordinated by VTT, the consortium brings together both policy in-the-field expertise and scientific expertise from academia and research communities.

Finland

VTT Technical Research Centre of Finland Ltd (VTT), is a state owned and controlled non-profit limited liability company established by law. As an impartial non-profit Research and Technology Organisation (RTO) and with the national mandate and mission to support economic competitiveness, societal development and innovation, VTT carries out research and innovation activities for the needs of industry and knowledge-based society.

As lead partner, VTT coordinates TetRRIS project.

2.4. Pilot Regions

- Figure 5 depicts the fourth page of the live Website.
- Following this link, you can see the '*Pilot Regions*' page. fully developed and on display.
- The information provided here serves. to inform viewers on the principal activities and structuring of the project, i.e. the pilot regions. Each pilot region is described in detail.

Figure 5: 'Pilot Regions' page

territories. The research and innovation policy systems (TRIS) and regional development of these territories are the core spaces through which the four pilot experiments' activities and research will be organised. Within TetRRIS four territories brought together by pilot experiments : Tampere Region; Karlsruhe Technology Region; the Autonomous Community of Cantabria; Szeged-Timisoara region.

Pilot 1 – Tampere Region

THE FINNISH REGION OF TAMPERE HAS A HIGH LEVEL OF ECONOMIC DEVELOPMENT IMPACT IN FINLAND AND BEYOND.
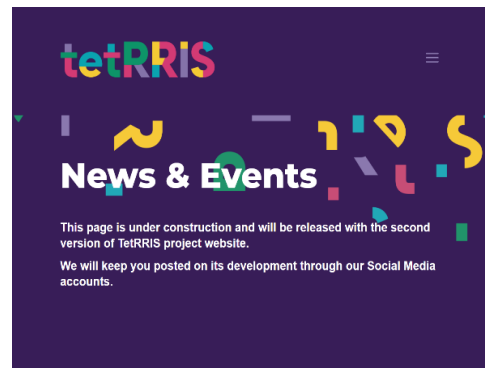

Internationally well connected with major firms active in the region (Nokia). Intellectually well served by the Finland's second largest university located in the region's Tampere City. Tampere Region reinvents its traditional industries for the future. Part of the needs of the future reinvention of the region and its economy are intertwined with Industry 4.0 with its increasing automation and the rapid growth of the digital innovation ecosystem.

2.5. News & Events

- Figure 6 depicts the final first version page of the live Website.
- Following this link, you can see the '*News & Events'*. page fully developed and on display.
- The information that will be provided here by the project will update website visitors on the notable milestones achieved and activities undertaken by the project.
- Current, the page is being redesigned before its launch and will follow a similar appearance to the webpage displayed in Figure 7.
Figure 6: 'News and Events' page (1)

News & Events

This page is under construction and will be released with the second version of TetRRIS project website.

We will keep you posted on its development through our Social Media accounts.

Under Construction

#ResponsibleRegions – Third Dialogue

by Morgane | Jan 22, 2021 | news, Regions

#ResponsibleRegions is a series of monthly webinars dealing with the concepts of the Smart Specialisation

Second #ResponsibleRegions Dialogue: How To Include RRI In Regional Innovation Policies

by Morgane | Jan 22, 2021 | news, Regions
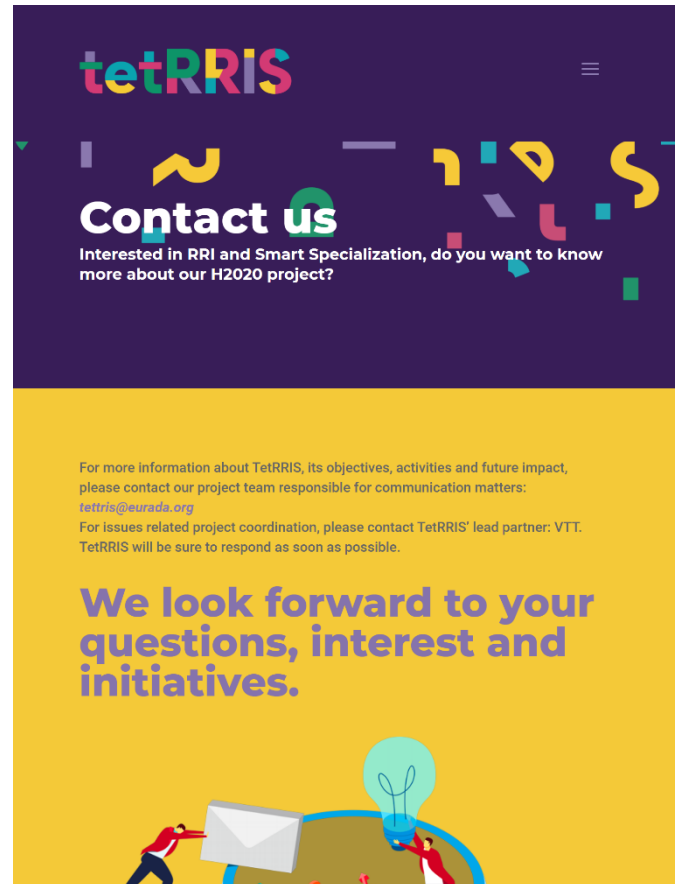

2.6.   Contact

- Figure 8. shows the last page of the website.
- Following this link, you can see the '*Contact Us'* page. fully developed and on display.
- The information provided by the project serves to allow visitors to reach out to and contact project partners responsible for daily the management and communication of the project.

TetRRIS

3. Version 2 - Pages

3.1. Update

In line with the approach designed by the project's Work Package 7, several versions of the website will be launched with content created updates for several pages of TetRRIS project's website. Whole new pages (Impact, RRI World, Blog, Deliverables) will be added as well as the creation of sub-pages (Pilot Regions, News & Event). Current Status

Table: Status of Website Pages Version 2

Page	Description	Status
Pilot Regions	Subpages - 1 per region	Design Phase
Impact	Static page	Design Phase
RRI World	Subpage – RRI projects	Design Phase
RRI World	Subpage – RRI World engagement	Design Phase
Deliverables	Static page where public status project deliverables are accessible	Design Phase
News	Subpage 'Blogs'	Design Phase
News	Subpage 'Events'	Design Phase
